November 14, 1990

Marvin W. Christianson, MS, OTR/L
Manager, Department of Physical
Medicine and Rehabilitation
Geisinger Medical Center
Danville, PA 17822

Dear Mr. Christianson:

The State Board of Occupational Therapy discussed your letter concerning the use of the Neurometer CPT by occupational therapists at the November 9, 1990 Board Meeting.

Please be advised that this is acceptable as long as the occupational therapists have received the appropriate education and training and as long as the Neurometer CPT is used under the auspices of being an evaluative tool for the purposes of developing and/or modifying treatment plans/goals.

By copy of this letter, we are notifying the Physical Therapy Board of your request for an interpretation relevant to physical therapists.

If we can be of further assistance, please contact this office.

Sincerely,

Helen L. Hopkins
Chairperson
